EDUCATION

Master of Science, Computer Science University of Southern California	May 2024 3.85/4.00
Bachelor of Technology, Computer Science and Engineering Indian Institute of Technology Dharwad	June 2021 8.86/10.00

SKILLS

Python, PyTorch, NumPy, pandas, scikit-learn, NLTK, HuggingFace, Matplotlib, C++, C, GDB, Bash, Linux, Linux4Tegra, macOS, Weenix OS, HTML, CSS, Git, LaTeX, MATLAB, SQL

WORK EXPERIENCE

Project Associate - I, DREAM:Lab, Department of Computational and Data Sciences Indian Institute of Science, Bangalore, KA, India	August 2021 - July 2022
<ul style="list-style-type: none">Contributed to a research project on optimizing performance of deep learning workloads on edge-GPUs [1, 3, 4], and a review of systems research into training deep learning models on edge hardware [2].Developed a comprehensive instrumentation harness that profiled various system and workload parameters such as CPU, GPU and RAM utilization, average and instantaneous power.Implemented and automated large-scale training runs of several deep learning models such as ResNet-18, MobileNetV3, and LeNet-5, across 3 classes of Nvidia Jetson devices - AGX, NX, and Nano. The project made significant progress and led to several publications at top venues in less than a year. Received NSF Travel Grant to present [1] at SIGMETRICS @ ACM FCRC 2023 (core A*) at Orlando, FL.	

INTERNSHIP EXPERIENCE

Machine Learning Software Intern DeGirum Corp., Santa Clara, CA, USA	May 2023 - August 2023
<ul style="list-style-type: none">Developed an ONNX OCR pipeline with pre/post-processor modules compatible with edge-hardware [OCR].Created a NumPy-only implementation of forward pass of some vision-based PyTorch operators such as Conv2D, MaxPool, among others, and published as a PyPI package [beaverpy].	

OTHER EXPERIENCE

Course Producer, Thomas Lord Department of Computer Science University of Southern California., Los Angeles, CA, USA	August 2023 - May 2024
<ul style="list-style-type: none">Graded assignments, held discussion sessions, and scribed lectures, for CSCI 699 Theory of Machine Learning and CSCI 567 Machine Learning courses.	
Research Assistant, Thomas Lord Department of Computer Science University of Southern California., Los Angeles, CA, USA	April 2023 - August 2023
<ul style="list-style-type: none">Added a new functionality for Orthogonalized ALS [Orth-ALS] to Tensor Toolbox, an open source project on tensor decomposition methods for MATLAB, and worked on a faster C++ implementation of a random forest based anomaly-detection algorithm [PIDForest].	
Undergraduate Researcher, Department of Computer Science Indian Institute of Technology Dharwad, KA, India	August 2020 - June 2021
<ul style="list-style-type: none">Performed research on Federated Algorithms with Bayesian [5] and Exponential Weighted Average approaches.	

ACADEMIC PROJECTS

A comparison of shared encoders for multimodal emotion recognition	
<ul style="list-style-type: none">Developed unimodal audio and vision, and multimodal emotion recognition pipelines by employing various classes of shared encoders – 2D CNNs (ResNet18, GoogLeNet, VGG16), 3D CNNs (Simple3D CNN, I3D), Transformers (ViT, VideoMAE). Tested pipelines on a full-scale version of CREMA-D dataset. Presented a principled comparison of performance of different pipelines and encoders, identified achievements and shortcomings of these architectures, and discussed implications.	

Leveraging static analysis for evaluating code-generation models

- Developed a pipeline that integrates static errors generated by linters (cppcheck, flake8) as feedback to improve baseline code generation model (CodeLlama), and fine-tuned model using DPO to enhance its ability to directly generate code with fewer errors. Demonstrated effectiveness of both strategies in reducing frequency of static errors in generated code.

Forward-Forward: Is it time to bid adieu to BackProp?

- Compared FF with traditional BackProp framework. Studied architectural differences of FF and BackProp and explored new architectures. Analyzed system performance of FF and BackProp.

Classical ML

- Performed dataset exploration to identify potential trends, seasonal patterns, and features for Store Sales - Time Series Forecasting competition on Kaggle. Trained various models from linear regression to decision-tree regressors on enriched feature set.
- Identified bias towards non-fraud transactions in a Kaggle dataset on credit card fraud detection. Addressed bias by employing bagging of feature vectors and assigning weights to classifiers associated with every bag. Trained SVM with Gaussian and Polynomial kernels using two strategies.

Operating Systems

- Implemented Procs, VFS, and VM kernel modules of Weenix OS.
- Added functionality for Immediate Files in Minix OS.

Distributed Systems

- Proposed hashing techniques that address heterogeneity of node capacities in light of consistent hashing properties.

Databases

- Provided page buffering for the PF layer of ToyDB using LRU and MRU page replacement strategies.

Computer Architecture

- Implemented parts of processor simulator for ToyRISC ISA.

Networks

- Emulated congestion control algorithm of TCP over a UDP socket.

HONORS

- [2024] Gift Award worth INR 600,000 and Travel Grant worth INR 50,000 by Tata Education and Development Trust for studies abroad.
- [2023] J N Tata Endowment Scholarship worth INR 900,000 for the year 2023-24, towards master's.
- [2023] NSF Travel Grant worth USD 1200 for attending SIGMETRICS, co-located with ACM FCRC 2023.
- [2020] AP grade for exceptional performance twice: CS 405 B. Tech. Project - CSE on Federated Learning in Autumn 2020-21, and CH 301 Environmental Studies in Spring 2019-20, during B. Tech. at IIT Dharwad.
- [2017] IIT JEE (Advanced) All India Rank 8682 among ~171,000 candidates.
- [2016] Telangana State Rank 1 among ~700,000 candidates in first year and under top ten ranks in second year TSBIIE Intermediate Public Examination.
- [2014] Certificate of Merit from CBSE Delhi, for outstanding performance and for obtaining Grade A1 in all five subjects in Secondary School Examination
